

21COE Lecture

Professor Roeland. J. M. Nolte

Radboud University Nijmegen
Nijmegen, The Netherlands

"From Single-Molecule to Supramolecule Catalysis"

Professor Nolte's research interests span a broad range of topics at the interfaces of supramolecular chemistry, macromolecular chemistry, and biomimetic chemistry. He focuses on the design of catalysts and (macro) molecular materials. He and his group have published over 500 scientific papers!
